實驗項目-C語言的條件運算

一、 本節目的:

- 學習開發 C 語言程式
- 實現在 Visual Studio 2013 系統設計平台上

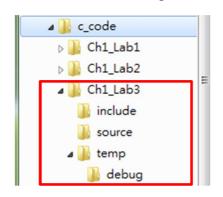

二、 設計重點:

● C語言的條件式應用

三、 設計步驟:

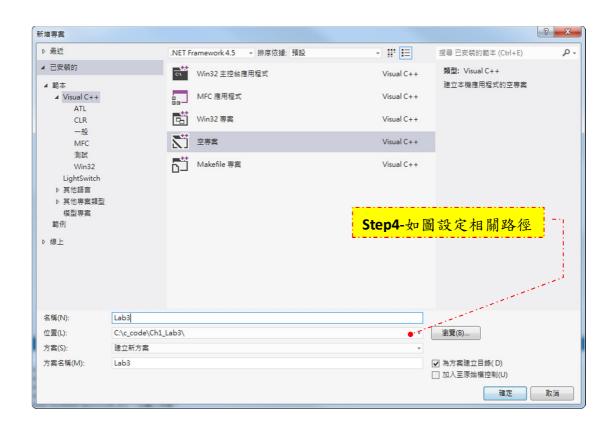

1. 建立新的空專案

Step1-在 C:\c_code 資料夾內新增名為 "Ch1_Lab3" 的資料夾,再於 Ch1_Lab3 資料夾內分別建立 include、source、temp 等資料夾,建立後需要在 temp 資料夾內新增名為 "debug" 的資料夾,建立完成後如下圖

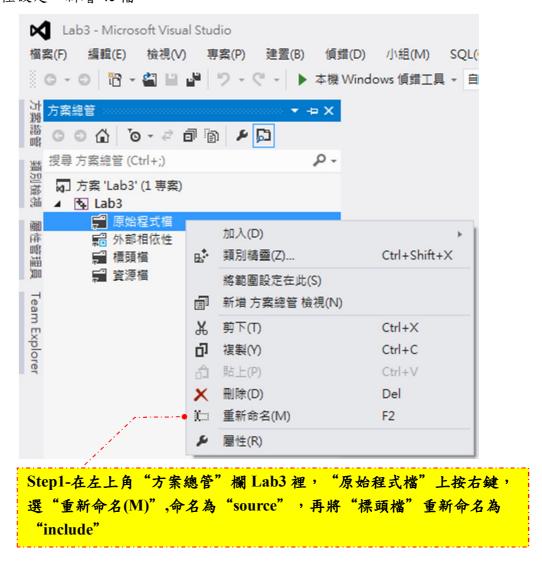

Step2-開啟 Microsoft Visual Studio 視窗畫面後點選左上角 "開始(F)" Step3-點選 "新增(N)" 再點選 "專案(P)"

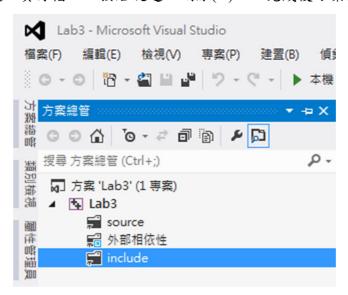

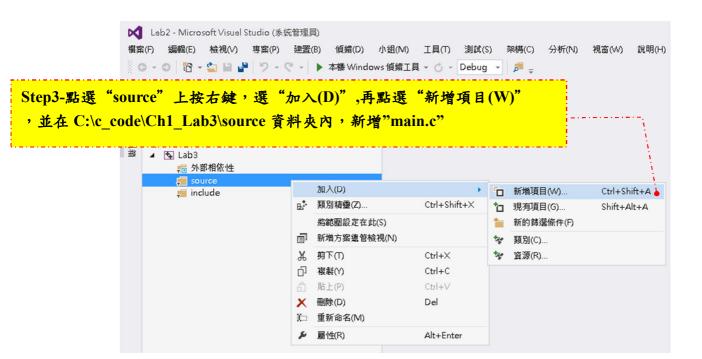

2. 路徑設定、新增 .c 檔

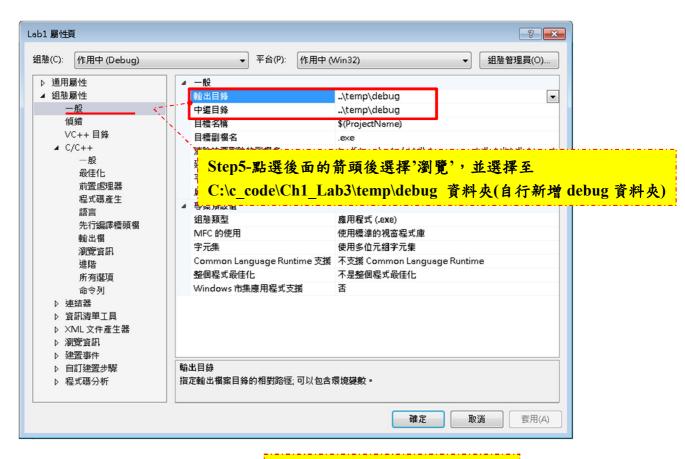

Step2-點選"資源檔",按右鍵選"刪除(D)",完成後方案總管如下圖

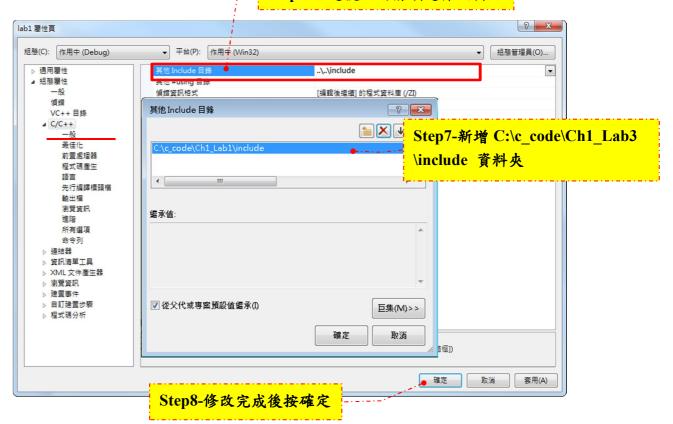

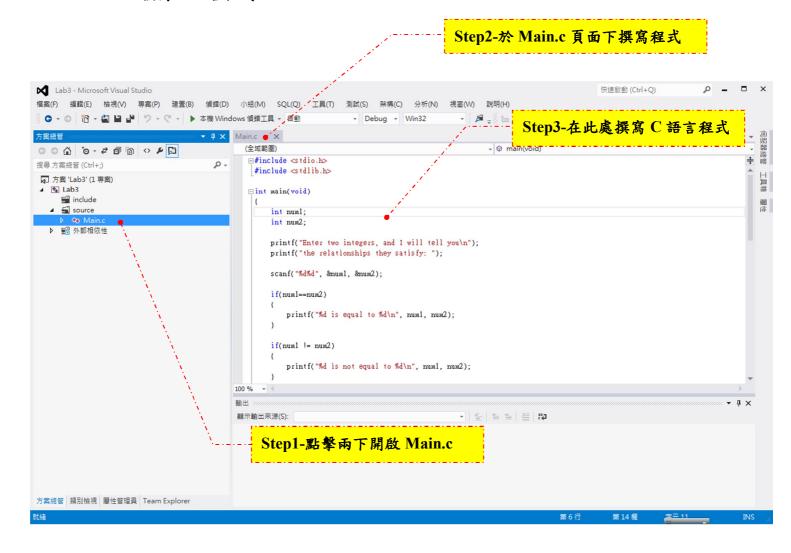

Step6-點選後面的箭頭選擇編輯

3. 撰寫 C 語言程式

Main.c 程式碼:

```
1 = #include < stdio.h>
     #include <stdlib.h>
 3
 4 □int main(void)
 5
 6
         int num1;
 7
         int num2;
 8
 9
         printf("Enter two integers, and I will tell you\n");
10
         printf("the relationships they satisfy: ");
11
12
         scanf("%d%d", &num1, &num2);
13
14
         if(num1==num2)
15
16
             printf("%d is equal to %d\n", num1, num2);
17
18
19
         if(num1 != num2)
20
21
             printf("%d is not equal to %d\n", num1, num2);
22
23
24
         if(num1 < num2)
25
26
             printf("%d is less than %d\n", num1, num2);
27
         }
28
29
         if(num1 > num2)
30
31
             printf("%d is greater than %d\n", num1, num2);
32
         }
33
34
         if(num1 \ll num2)
35
36
             printf("%d is less than or equal to %d\n", num1, num2);
37
         }
38
39
         if(num1 >= num2)
40
41
             printf("%d is greater than or equal to %d\n", num1, num2);
42
43
44
         system("pause");
45
         return 0;
46 }
```

4. 執行與測試程式結果

Step1-點選開始偵測,進行偵測
